MORE INVENTIVE

Combined with the X-Mind® unity intraoral X-ray generator, SOPIX® inside with ACE technology **limits the emission of X-rays** during the acquisition to the necessary amount for the patient's morphology. It uses the **minimum dose** required to provide a high-quality image.

LESS INVASIVE

Using X-Mind® unity intraoral X-ray generator with SOPIX® inside, the patients **receive the minimum dose required for their dental morphology**. Patients and staff are protected from unnecessary radiation.

It's frustrating when a portable sensor goes missing or gets damaged. Having the sensor integrated with the tube head makes a lot of sense. My team can use the X-Mind® unity without delay; saving time means saving money.

SOPIX® inside connects effortlessly to the X-Mind® unity without technical assistance within a minute.

Plug and Play!

ERGONOMIC AND SIMPLISTIC

A CLEAR AND LARGE LCD SCREEN to easily see the main parameters at a distance

THE "MEMORY" FUNCTION allows modifying for the pre-programmed exposure times to adapt to the specifications of your sensor or film

THE EXPOSURE PARAMETERS are adjusted according to the type of tooth (incisor, premolar, molar)

Acquiring an X-ray is done with the integrated firing switch. A remote firing switch is available as an option.

• Displays **THE PARAMETERS** kV, mA, type of film and ACE selection (SOPIX® inside)

• **THE DOSE IS DISPLAYED** when simultaneously pressing the buttons “- and +”

• Selection of the **PATIENT MORPHOLOGY** adult, child

• **SELECTION OF THE EXAM TYPE** occlusal or inter proximal

OUTSTANDING WORK FLOW

FLUID AND STABLE

You can singlehandedly position and stabilize X-Mind® unity.

Movement is fluid and is done without any effort or stress.

The anti-vibration and anti-movement mechanism ensures drift free positioning during an exposure.
