Welcome to the **Swiss Dental Academy (SDA)** – your path to the future of dental care! At SDA, we're not just about dental education; we're revolutionizing it with Guided Biofilm Therapy (GBT). Here, you'll learn innovative, patient-focused techniques that set you apart in the world of dental prophylaxis and non-surgical periodontal treatment.

Experience the Swiss difference! SDA combines Swiss precision and innovation to offer world-class training. We're more than a learning center; we're a global movement, reshaping dental care with proactive prevention and patient-centered strategies.

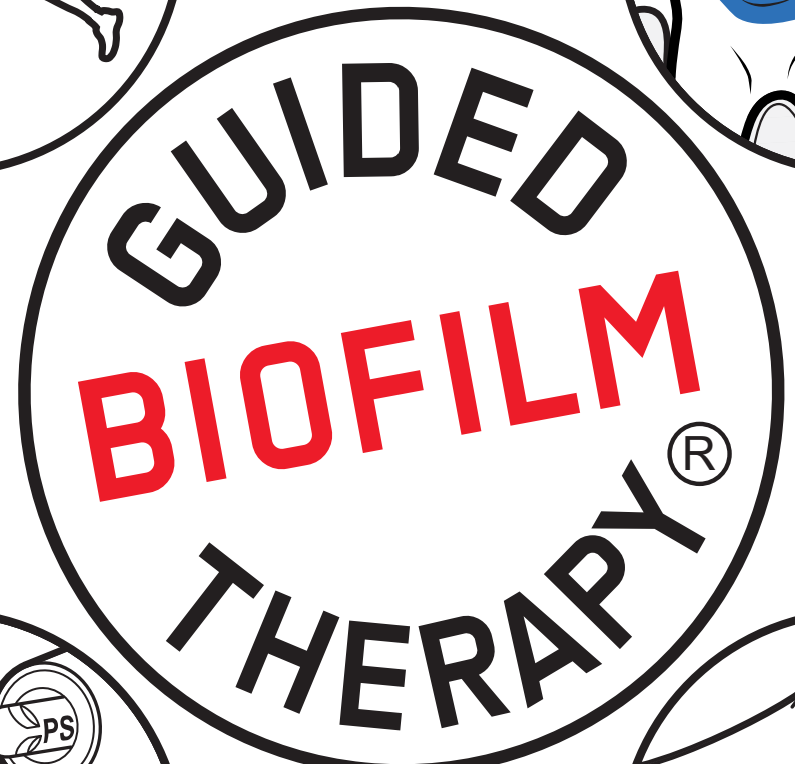

Our courses, crafted by top dental experts and taught by renowned trainers, are more than just lessons – they're your stepping stones to becoming a leader in dental care. With SDA, you gain skills, inspire change, and commit to the highest standards of patient care.

Stay ahead in your field with SDA. Our ever-evolving curriculum, expanding course selection, and the latest technology ensure you're at the forefront of dental practices.

Join SDA today – lead the change in dental health, be at the frontier of dental excellence, and be part of a global community that's setting new standards in dental care. Your journey to excellence starts here!

The SDA stands as a beacon of excellence in dental education, passionately dedicated to shaping the future of oral health care through innovation, expertise, and an unwavering commitment to patient well-being.

08 RECALL

HEALTHY PATIENT = HAPPY PATIENT

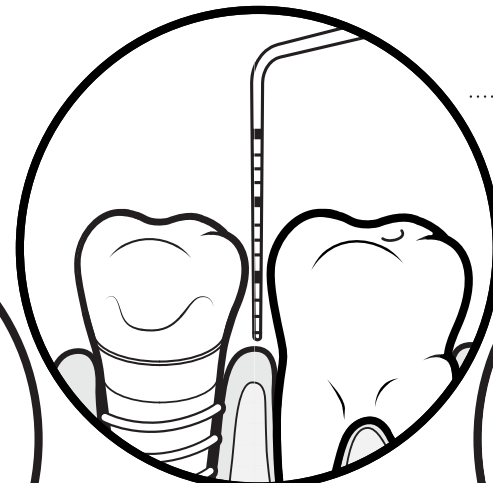

- ▶ Schedule recall frequency according to risk assessment
- ▶ Ask your patient if he or she liked the treatment

01 ASSESSMENT AND INFECTION CONTROL

ASSESS EVERY CLINICAL CASE AND IMPLEMENT HYGIENE MEASURES

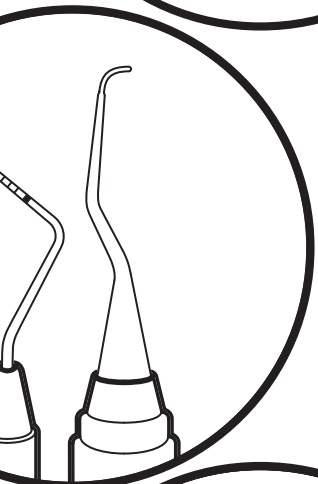

- ▶ Start by rinsing with BacterX® Pro mouthwash
- ▶ Assess teeth, gingiva and periodontal tissues
- ▶ Assess implants and peri-implant tissues

07 CHECK

MAKE YOUR PATIENT SMILE

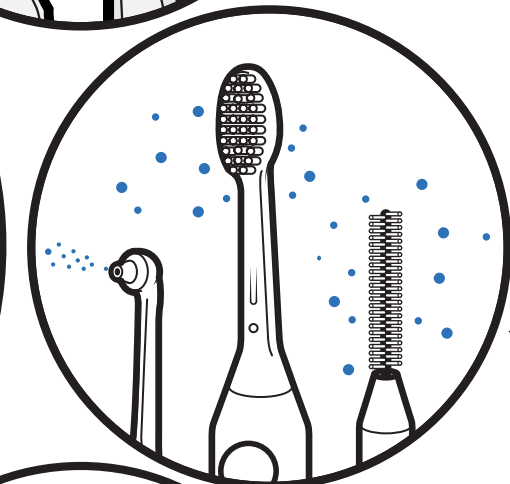

- ▶ Do a final check for remaining biofilm
- ▶ Ensure calculus is fully removed
 - ▶ Accurately diagnose caries
 - ▶ Protect with fluoride
 - ▶ No polishing anymore

02 DISCLOSE

MAKE BIOFILM VISIBLE

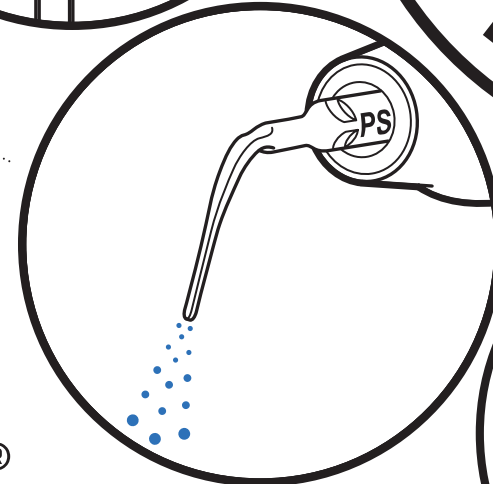

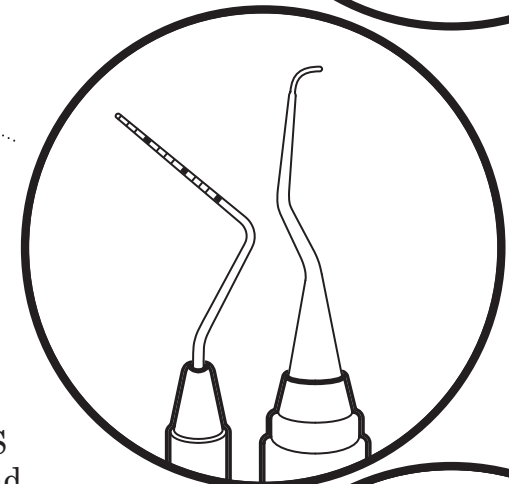

- ▶ Highlight to patients the disclosed biofilm and their problematic areas with EMS Biofilm Discloser
- ▶ The color will guide biofilm removal
 - ▶ Once biofilm is removed, calculus is easier to detect

06 PIEZON® PS

REMOVE REMAINING CALCULUS

- ▶ Use the minimally invasive EMS PIEZON® PS Instrument supra- and subgingivally up to 10 mm
- ▶ Clean > 10 mm pockets with mini curette
- ▶ Use EMS PIEZON® PI MAX Instrument around implants up to 3 mm subgingivally and on restorations

03 MOTIVATE

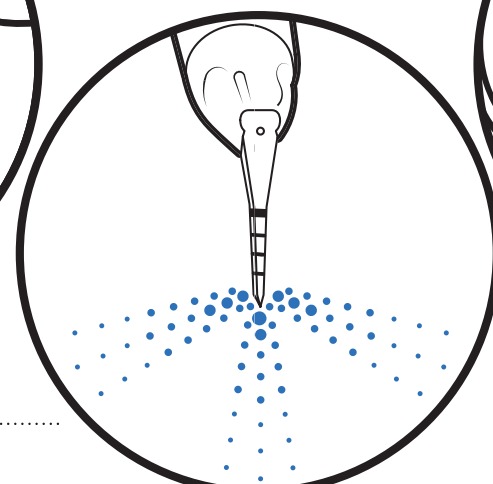

RAISE AWARENESS AND TEACH

- ▶ Emphasize the importance of prevention
- ▶ Instruct your patients in oral hygiene
- ▶ EMS recommends interdental brushes or dental floss as well as electric or manual toothbrushes and AIRFLOW® erythritol toothpaste for daily home care

05 PERIOFLOW®

REMOVE BIOFILM IN >4 TO 9 MM POCKETS

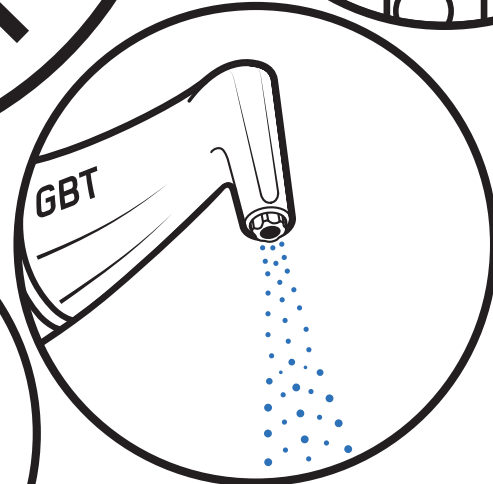

- ▶ Use AIRFLOW® PLUS Powder on natural teeth in deep pockets and root furcations and on implants
- ▶ Use new and slimmer PERIOFLOW® Nozzle

04 AIRFLOW® MAX

REMOVE BIOFILM, STAINS AND EARLY CALCULUS

- ▶ Use AIRFLOW® MAX for natural teeth, restorations and implants
- ▶ Remove biofilm supra- and subgingivally up to 4 mm using AIRFLOW® PLUS 14µm Powder
- ▶ Also remove biofilm from gingiva, tongue and palate

Global Testimonials from Clinicians

The Impact of GBT

"GBT in-practice training provided by the SDA was an investment with the best possible return - economically, clinically and in terms of positive team spirit."

Kathrin Bajrami-Kober,
Dentist

"The SDA is the place to be for every dental professional. It's a multinational family with an ultimate goal: sharing scientific evidence and latest technology about dental prophylaxis."

Gloria Kahalill,
Dentist

"The SDA is the premier resource for preventive and therapeutic dental education. The course curriculum will provide attendees with the highest level of evidence-based research and practical clinical applications. SDA courses will transform your professional life!"

Melissa Obrotka,
Dental hygienist

"As the Global Director of the SDA, I firmly believe that the essence of our success lies not just in advanced technology or sophisticated techniques, but in our unwavering commitment to improving lives—one smile at a time with GBT."

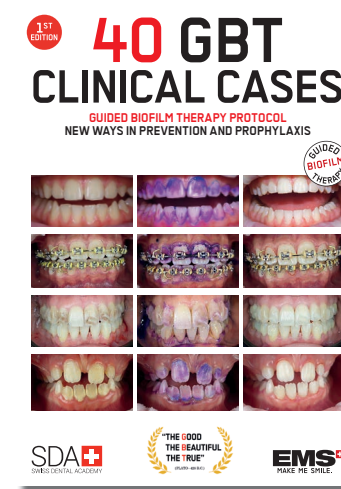

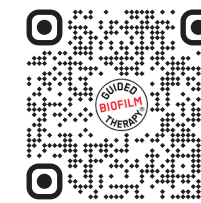

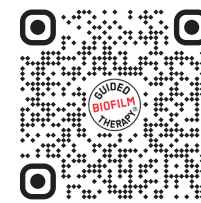

Celso Da Costa,
Global Director,
Swiss Dental
Academy

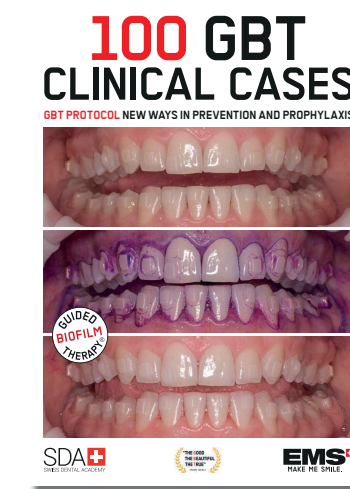

Guided Biofilm Therapy is a game-changing, evidence-based approach for prevention and therapy, tailored to each patient's needs. It's minimally invasive, ensuring comfort and efficiency.

Join thousands of clinicians worldwide already using the GBT protocol. Learn from the best, enhance your practice, and see the difference firsthand. Plus, get access to GBT clinical cases for practical insights in the below ebooks.

A Global Network of Excellence

SDA's Course Offerings

- Training center course
- In-practice course
- Virtual

LEVEL 1:

- GBT in-practice (GBT at your doorstep)
- GBT Training center

LEVEL 2:

- GBT Intensive Hands-on Master Class: AIRFLOW MAX®, PERIOFLOW®, PIEZON® PS, PIEZON® PI MAX and PIEZON® PSL/PSR
- GBT in Periodontics
- GBT in Implantology
- GBT in Orthodontics
- GBT in Pediatric Dentistry
- GBT in Geriatric Dentistry
- GBT in Cariology
- GBT coaching
 - GBT in Economics
 - GBT Marketing

LEVEL 3:

- GBT Advanced Master's Program (once a month over 6 months)

LEVEL 1: BASIC UNDERSTANDING OF GBT

GBT in practice (GBT at your doorstep):

Train all your staff including front office personnel, dentists and specialists on GBT in your own practice at your own convenience with respect to time and date. Highly trained certified SDA trainers will come and give personalized attention in relation to implementation of GBT in daily clinical practice.

GBT training center:

The basic GBT course is also available at a GBT training center across 10 different cities. These centers are equipped with state-of-the-art technologies where you can learn not only the techniques and optimal usage of GBT, but also get the chance to work on each other and experience GBT first hand.

LEVEL 2: UNDERSTANDING ALL CLINICAL APPLICATIONS OF GBT IN DEPTH

GBT Intensive hands-on Master Class:

This course can be taken in the comfort of your own practice or at a GBT training center. The focus of this hands-on event is to learn the correct technique for optimal safety, efficiency & comfort while effectively managing aerosols using AIRFLOW® MAX, PERIOFLOW®, PIEZON® PS, PSR, PSL & PI MAX instruments.

GBT in Periodontics:

This course emphasizes the clinical application of GBT in non-surgical periodontal therapy and subsequently on supportive periodontal therapy using minimally invasive and maximally preventive AIRFLOWING® technology in addition to PIEZON®.

GBT in Implantology:

Implementation of GBT using AIRFLOWING® & PIEZON® in all phases of implant therapy, starting from primary to secondary and tertiary prevention of peri-implant diseases is highlighted. Accessing the biofilm for optimal removal through preservation of the abutments and implant surface is the focus.

GBT in Orthodontics:

Considering the high prevalence of white spot lesions in patients with orthodontics, the lack of motivation in maintaining oral hygiene amongst children and teenagers is alarming. This course teaches you how to overcome these challenges through AIR-FLOWING®, as well as safety in terms of preserving orthodontic appliances, including aligners.

GBT in Pediatrics:

With this course, learn how to treat children of all age groups in terms of behavioral, emotional and psychological aspects to overcome fears of dental offices. This provides them with a positive GBT experience, at the same time offering reassurance to parents, building trust and confidence. What instrumentation, why and how to use it correctly to ensure NO PAIN is also emphasized.

GBT in Geriatrics:

Aging is natural physiological process. This course focuses on understanding the oral changes in geriatric patients and how, through GBT, we can best manage their biofilm and calculus in a professional environment in order for them to continue eating and maintaining a healthy body and smile.

GBT in Cariology:

Caries is multifactorial. Prevention of the same requires not only managing and understanding the risk factors, but also an emphasis on oral hygiene at home, diet assessment, regular professional teeth cleaning, good recall, etc. This course enables you to understand and manage the above in order to prevent dental caries.

GBT coaching:

These 2 courses are essential in today's health care environment, since awareness and the value of GBT must be created and understood by the entire team involved in the treatment, as well as front-of-house staff. Both courses are virtual.

› **Economics:** Through GBT, not only is the dental office successful, by gaining patient trust and confidence thanks to a domino effect but also profitable while being completely ethical.

› **Marketing:** This course will help enhance the value of GBT through patient satisfaction data, scientific evidence and testimonials from patients and clinicians creating not only awareness but also a desire to experience GBT.

LEVEL 3: ADVANCED MASTER CLASS IN GBT

This course comprises modules taught over a period of 6 months where clinicians who are already in practice can go delve further GBT, with an emphasis on hands-on, overcoming daily challenges that they face in clinical practice, tips & tricks on managing work, solving small aftersales issues, and how to optimize the usage of their GBT machine, etc.
