Intra-oral Adjustment/Polishing for Zirconia and Lithium Disilicate

Adjust and Polish Zirconia and Lithium Disilicate the **eZr** Way!

eZr Intra-oral Adjustment:

- No chatter, chipping or microfracture** - Unlike diamonds bonded directly to a hard metal shaft, eZr's rubber substrate cushions the diamonds to prevent damage to the restoration.
- No heat build-up** - The carefully engineered substrate does not transfer heat during use.
- FAST!** - eZr's coarse grit blue grinders make your adjustments fast and convenient.

eZr Intra-oral Polishing:

- Unparalleled smooth polish** - Don't take our word for it! - "The eZr system is the only one I've tried that polishes zirconia to smooth!" Todd Brower, DDS, Holland, Michigan.
- Increased physical stability** - Highly polished zirconia and lithium disilicate is stable and non-abrasive to opposing dentition.
- No paste required** - Forget the mess and expense of polishing pastes. eZr™ is all you need.
- No water required** - No need to use water when polishing. Water is only required for high speed.

1 Start by gross adjusting and contouring using the blue coarse grit grinders. Use the flat end taper for occlusal/labial/lingual/buccal surfaces and the disc for interproximal surfaces.

2 Use the green medium grit polishers for smoothing and pre-polishing. Use the point for the occlusal grooves, the cup for labial/lingual/buccal, and the disc for interproximal surfaces.

3 Use the orange fine grit polishers for high gloss polishing. Use the point for the occlusal grooves, the cup for labial/lingual/buccal, and the disc for interproximal surfaces.

Beautiful results!

NEW OFFICE BUILDS AND CUSTOM REMODELING

1. PLAN

A four step process, from modern renovation to a comprehensive new build, we make sure we bring your vision and dreams to life. We blend our expertise and innovation with precision and care to make you happy and your patients comfortable.

2. DESIGN

It all starts with finding the best location for you, developing the preliminary design and obtaining the permits and licensing applications. We then bring in our mechanical engineers, equipment specialists and interior designers. Making sure that your new practice looks great and meets all current standards and requirements, your patients and employees will love your new, stylish, efficient and comfortable environment.

3. BUILD

Spectral Vision. Informed Decisions.

NEW

INTRODUCING THE VELscope Mantis

VELscope Mantis is a state-of-the-art oral mucosal examination tool to assist the dental professional in performing comprehensive oral examinations. The Mantis integrates both traditional white light visualization, polarized white light visualization and blue-light-induced fluorescence visualization into the same device.

Innovative Multi-Mode System for Versatile Oral Screening + Discovery

**Non-Polarized
Light**

**Polarized
Light**

**Fluorescent
Light**

Non-polarized white light visualization is the traditional method for examining tissue, providing a combination of surface reflections that highlight texture and topography, along with color variations that indicate the state of the underlying tissue.

Polarized white light visualization excels at showing subtle colour tissue changes by improving colour response and eliminating surface reflections that can be distracting and obscure underlying tissue.

The new VELscope Mantis builds upon its predecessors by increasing field of view and enhancing filtering for a brighter, improved image with increased yellow/orange spectral content.

3DISC Taking Digital Beyond

The all new

OVO3

Introductory Price!
\$14,990

The OVO3 scanner is built on a foundation of over 1,000,000 scans and real-world clinical experience.

We leverage insights from over 40 reference dentists and collaborate with them daily. In addition to contributions from our internal team of eight dentists, we've gone beyond industry standards, pushing digital innovation to deliver tangible and relevant clinical benefits.

We have reassessed and improved every aspect of scanner usage, making it the only truly clinical scanner on the market.

Engineered from the ground up for unmatched accuracy, cutting-edge technology, and effortless usability, this is more than just a tool - it's the future of clinical precision and efficiency.
