VELscope Mantis | DF Dental Solutions

SPECTRAL VISION · INFORMED DECISIONS

NOW AVAILABLE

The Next Evolution of Oral Cancer Screening Has Arrived.

30yrs Early detection of oral cancer is **critical.**

The mortality rate for oral cancer has not decreased in over 30 years.

Beyond the naked eye

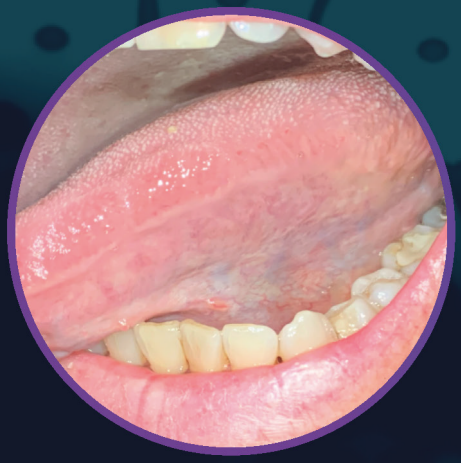

VELscope Mantis identifies oral abnormalities that are not visible to the naked eye.

Screenings save lives

Regular oral cancer screenings can save patient lives — in a two-minute chairside exam.

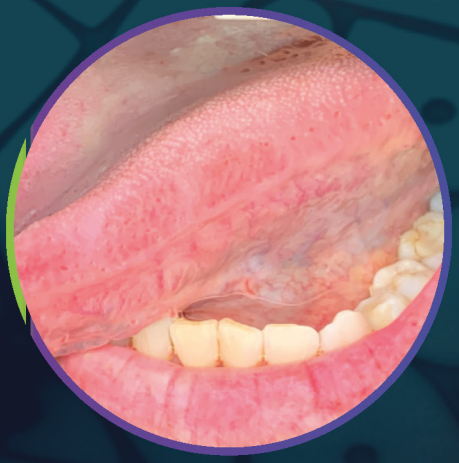

See prevention in a new light.

Three visualization modes in one cordless handpiece — with photo documentation built in.

NON-POLARIZED

Traditional white light for surface texture and topography.

POLARIZED

Glare removed to reveal subtle color change and vasculature.

FLUORESCENCE

Blue-light fluorescence across a wider field of view.
